Subject: School Update Parking

School Update (09-04-2015)

Hello Centurions!

I was able to walk the site parking and entrance area this morning and think it will be completed and open the first day of school on Tuesday, September 8, 2015.

As we access the new area on Tuesday, we need to follow some new and temporary guidelines. Starting at the two vehicular entry points, the south (cattle/marquee) gate and the north (Centurion Square) gate, cars once on campus will not be permitted to cross from one parking lot to the other. We will be posting a directional map on the school's website to help visualize where to go on Tuesday.

Those entering the south lot, should only do so to park their vehicle for the day. This would be for students and staff only. The south lot is not to be used to pick up or drop off students. Again, the south lot is only for all day parking!

The south parking lot by the marquee will also be the entry point, and the only pedestrian entry point, for students walking onto campus from Genesee. Students coming down the hill on Genesee, from either direction, will have to enter the campus through the use the entrance gate by the marquee. At this time, the walkway for students by the traffic light is not complete. We are sorry for the extra walking this will require, but we hope to have the walkway completed by the end of the month. Students may not use the bus lane by the traffic light to walk up and down from school.

The north lot, at the traffic light, is for buses and for cars to drop off and pick up students. Some visitor parking spots will be available in this lot. When cars enter the school by the traffic light, they must veer to the right. The left lane is for buses only!

As mentioned, cars entering campus will veer to the right in two lanes which will lead to a drop off zone by the front office. At the front office there will be four lanes. The two lanes to the right of each island are for dropping off students. The left lanes for each side of the island are for passing and for exiting campus.

The north and south parking lots have available spots for handicap parking.

We will have staff out to help direct the traffic the first day. We anticipate long lines as we help everyone to better understand how best to navigate the new school entry points. We thank everyone in advance as we know it will require patience and flexibility as we all become adjusted to the new design.

Have a great Labor Day weekend!
